TULIPE MIRROR

Assembly Instructions & Care

WARNING

Mirror hardware is meant for two point hanging connection. Must locate studs in existing walls or use anchors for both hanging points. Please note that if you decide to hang from a single point, hardware, must be replaced with the correct assembly as necessary.

ASSEMBLY INSTRUCTIONS

1. Pick a spot to hang the mirror. Locating it over a stud is helpful, but not necessary with the right anchors. Always mark the center of the stud.
2. Measure up to your desired height and make a mark.
3. Drill in first screw or install first anchor if necessary.
4. With a level and ruler, measure the distance between the keyhole hardware and make a mark.
5. Drill in second screw or install second anchor if necessary.
6. With help, carefully lift mirror up to wall and place the keyhole hardware onto both secured screws.

CARE INSTRUCTIONS

To clean, wipe with a soft, dry cloth. Glass cleaner may be used but do not spray on painted or finished surfaces as this may damage the finish.
